

7 Ways to enhance the physician experience with Epic in 2017

Increase physician productivity, improve quality outcomes, and maximize your investment with Nuance products and solutions.

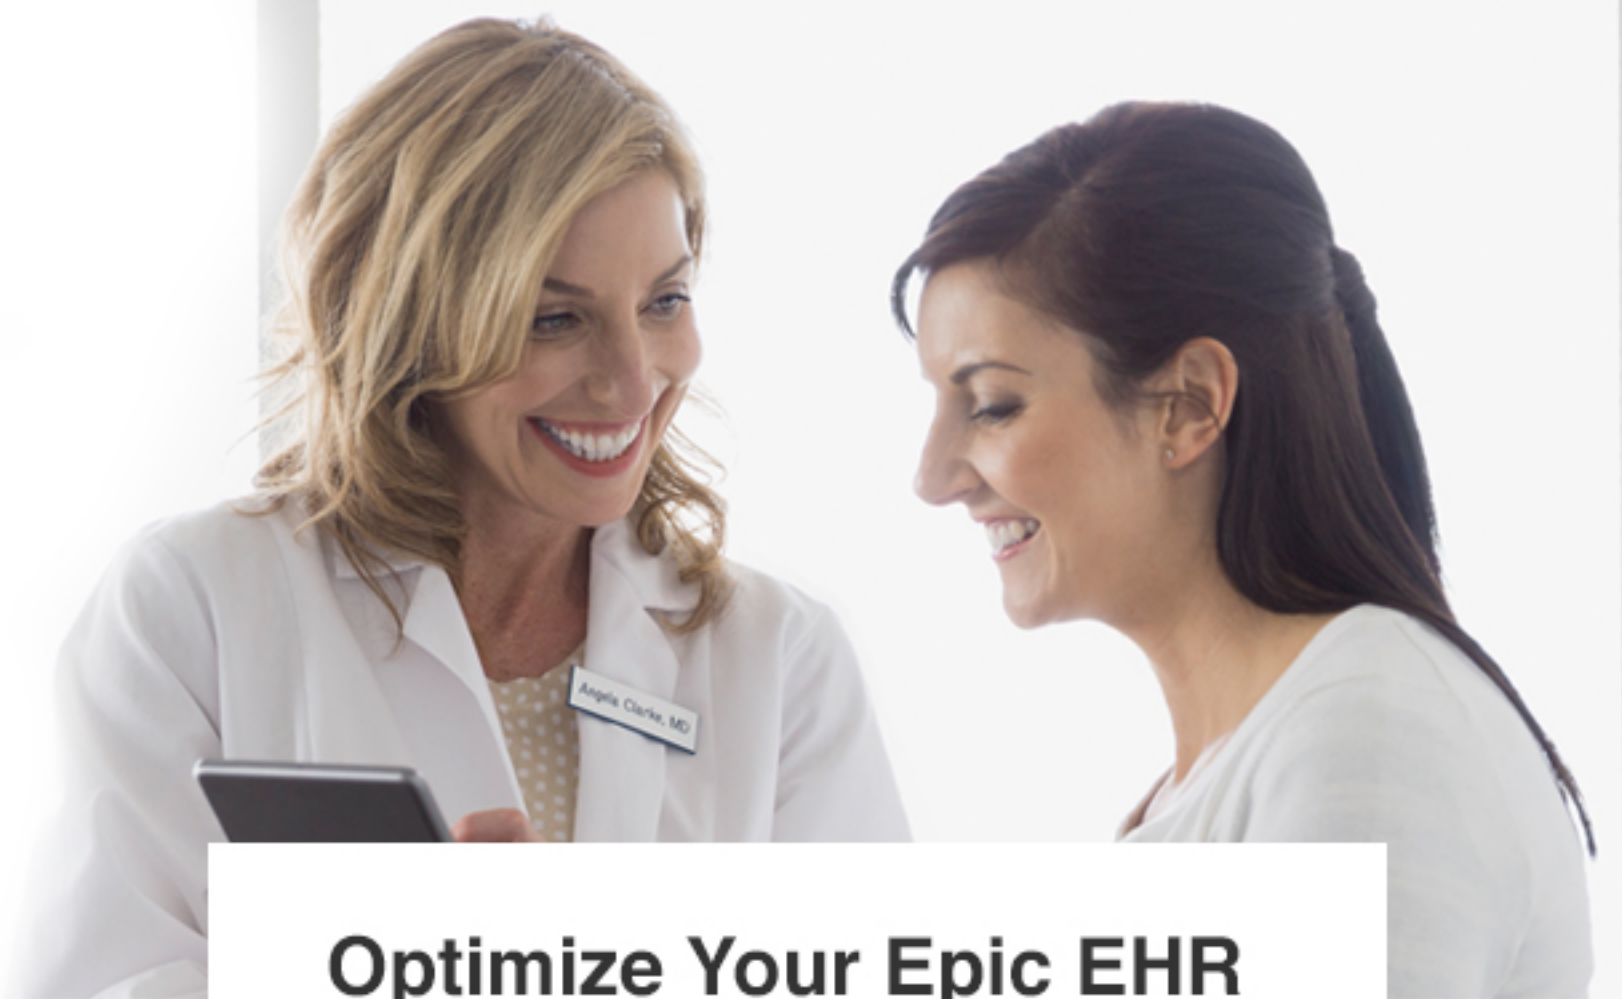

You've invested a lot in your Epic EHR system. But are you getting the benefits you hoped for when you started your implementation?

Download "7 Ways to Enhance Physicians' Experience with Epic in 2017" and discover how you can drive productivity, increase physician satisfaction and improve the quality of care with help from Nuance.

In this brief, you'll discover how to:

- **Improve physician productivity** by empowering your physicians with streamlined process tools.
- **Engage physicians** with voice-enabled documentation solutions.
- **Achieve unmatched quality outcomes** through use of integrated CDI and CAPD solutions.
- **Ensure appropriate reimbursement** with CDI solutions.
- **Improve radiologists' workflow** with integrated reporting and communication solutions.
- **Maximize results with Nuance's** professional services teams focused on guiding and achieving your objectives.
- **Extend partnered support for physicians, patients, and our clients** with service desks, analytical reporting, and continued education.

Nuance offers comprehensive solutions, certified Epic experts, and over 25+ years of clinical documentation improvement expertise to help you transform the way clinicians capture documentation and to achieve unmatched outcomes – from improvements in efficiency to greater physician satisfaction and higher quality of care.
